Gregory Cheradame

Senior Manager, Solution Architect ERP | Enterprise Architect | SAP & Digital Transformation

Verona, New Jersey | +1 609-558-7199 | gregory.cheradame@gmail.com | linkedin.com/in/gcheradame

PROFESSIONAL PROFILE

ERP and enterprise solution architecture leader with approximately 20 years of SAP and business systems experience, progressing from SAP technical development and functional consulting to project leadership, enterprise integration, application portfolio architecture and ERP transformation.

Delivery experience spans manufacturing, logistics, retail, e-commerce, distribution and energy, with assignments in France and the United States, aligning business processes, technology platforms and integration patterns.

CORE EXPERTISE

SAP SD | SAP MM | ABAP | SAP FI | Solution architecture | SAP S/4HANA | SAP WM | IDoc | Data migration | Cegid | Point of sale | SAP CO | SAP BW | SAP ECC | User exits | Performance tuning | Enterprise architecture | APIs | Flat-file interfaces | Oracle SQL | SAP PP | EDI | Middleware | Salesforce Commerce Cloud

PROFESSIONAL EXPERIENCE

Brother International Corporation | Senior Manager, Solution Architect ERP | Dec 2024 - Present

- **Integration architecture for an acquired business:** Documented the current processes and systems of an acquired business and prepared integration scenarios for review.
- **Application portfolio and capability mapping:** Connected applications to business capabilities and identified application ownership as part of an application portfolio management effort.
- **Architecture governance and standards:** Contribution to architecture governance through design reviews, architecture decision records, integration patterns and API standards.
- **Cross-functional solution design requests:** Solution reviews for business and IT teams on discrete ERP, data and process questions, alongside the larger programs.
- **Enterprise integration and EDI architecture:** Reference architecture for EDI and application integration, with attention to partner onboarding, monitoring and support.
- **Warehouse systems architecture assessment:** Architecture assessment of warehouse systems and their integration with SAP.
- **Multi-country SAP S/4HANA architecture reviews:** Architecture reviews of business-process scope, localization and integration dependencies for SAP S/4HANA across several countries.
- **SAP cloud architecture:** Architecture guidance on SAP cloud models, integration architecture and clean-core principles.

VISEO USA | Technical Lead · Functional Consultant · Project Manager | Aug 2011 - Dec 2024

- **Christian Dior Couture (2023-2024):** Managed the IT side of merging Dior's US e-commerce logistics into the existing retail warehouse run by a third-party logistics provider, from interface requirements through cutover, hypercare and warehouse operations.
- **ID Logistics / Kane Logistics (2022-2023):** Rolled the ID Logistics SAP S/4HANA core model out to its newly acquired US subsidiary Kane Logistics, adapting Kane's billing structure to the core sales and purchasing processes.
- **Tiffany & Co. (2021-2022):** Worked on the deployment of Cegid as the store system for Tiffany's US stores, covering master data, stock transfers and their interfaces.
- **Lacoste (2020-2021):** Led the implementation of Signifyd payment-time fraud prevention on Lacoste's Salesforce Commerce Cloud web stores, first for Mexico and then for Canada, from design and historical-data load to go-live tuning.
- **Christian Dior Couture (2020):** Designed and tested Cegid Y2 enhancements for the rollout of a POS solution built for Dior's US boutiques, then trained users and supported stores through go-live.
- **Lacoste (2020):** Managed the IT side of moving Lacoste's footwear division to a new third-party warehouse, whose interfaces were built to fit Lacoste's standard Orliweb solution, through testing, cutover and WMS go-live support.

- **Lacoste (2020-2021):** Prepared Lacoste's US pilot stores for a cloud mobile point of sale on iPhone: peripherals, cost tracking, internet connectivity, a dedicated store network and connectivity monitoring, with Cegid kept running in parallel.
- **Ingenico (2019-2020):** Configured new retail companies in SAP for Ingenico's separation of its Retail and Bank & Acquirer businesses in Canada, the USA and Mexico, replicating existing flows and building an intercompany re-invoicing flow.
- **Other assignments (2011-2019):** Longchamp USA, Adisseo / Nutriad, Nemera, Ingenico, U-shin, Parbel of Florida (L'Oréal), L'Oréal USA.

VISEO France | SAP Technical Consultant | Nov 2010 - Jul 2011

- **L'Oréal (France) (2010-2011):** Reinforced the development team of a group-wide L'Oréal program that optimized logistics replenishment flows on SAP SD and MM, building ALV reports, interfaces and user exits.
- **L'Oréal (France) (2010):** Set up a ReadSoft invoicing flow into SAP for L'Oréal's perfumery division, alongside SD bug fixes, performance work and user-exit programming.

Accenture Technology Solutions France | SAP Technical & Functional Consultant | Dec 2006 - Nov 2010

- **Univar (2010):** Reinforced the SAP SD development team of Univar, a global distributor of industrial and specialty chemicals, on enhancements and production fixes.
- **Total (2009-2010):** My first functional role: configuring a new pipeline-sales flow in SAP SD on top of IS-Oil TSW for Total's bulk oil logistics, and acting as the functional analyst and test lead for an offshore ABAP team in India.
- **Allianz France (2008-2009):** ABAP developer in Allianz France's SAP competence center for FI/CO and BW. Redesigned a legacy accounting-data load in object-oriented ABAP and monitored the nightly finance loads into BW.
- **Gaz de France (2006-2008):** ABAP developer on Gaz de France's SAP IS-U and CRM program for the July 2007 opening of the French energy market. Built inbound interfaces on a reusable file-to-IDoc pattern and tuned performance for a base of 11 million customers.

Earlier experience: LK Concepts, SAP BW Technical Consultant (2006) | Katoen Natie, Stock Supervisor (2005)
